COPENHAGEN -- TDC is now ready to present the most comprehensive offer for television on the cell phones yet seen in Denmark. Six of the most popular Danish television-channels can now be watched live on the cell phone. The channels are DR1, DR2, TV 2, TV 2 News, Kanal 4 and Voice TV.

"Live television on the cell phone is epoch-making news. With a cell phone in your hand you can now access all kinds of media which you earlier only had access to at home: television, music, e-mails and speaking to your friends and family," says vice president at TDC Mobile Anders B. Christjansen.

It is possible to access TDC Mobile Television via the mobile portal Fly. Currently only TDC's mobile customers can connect to mobile television, and a 3G cell phone is required. Also, mobile television can only be watched in areas covered by TDC Mobile's 3G network. Introduction prices including unlimited use are DKK 29 per day, DKK 49 per week, and DKK 69 per month.

"We have seen that consumers want to use their cell phone for television and music, together with all the things they normally use their personal computer for. That is why we recently introduced download of music on the cell phone and now we are ready to take the next step by introducing live television on the cell phone. Both music and television on the cell phone are heavy data services and by developing our 3G network we can ensure a satisfactory quality," explains Anders B. Christjansen.
